

**AMENDMENTS TO THE CLAIMS:**

Please **amend** the claims as follows:

5            1.        (Original) A method of establishing transmission to mobile station via a  
radio network, the method comprising:  
              providing a paging message to the mobile station;  
              providing an indication of a radio service requirement to the mobile station,  
              wherein said paging message comprises the indication of the radio service  
              requirement.

2.        (Cancelled)

3.        (Cancelled)

4.        (Cancelled)

15           5.        (Original) A method as claimed in claim 1, wherein the indication of the  
radio service requirements comprises properties of the cell capable of fulfilling the radio  
service requirement.

6.        (Original) A method as claimed in claim 5, wherein the indication of the  
radio service requirements comprises the required bandwidth of a cell.

20           7.        (Original) A method as claimed in claim 1, wherein the indication of the  
radio service requirement comprises the radio service requirement.

8.        (Original) A method as claimed in claim 1, wherein the indication of the  
radio service requirements comprises at least a portion of at least one access value.

9.        (Original) A method as claimed in claim 8, wherein the mobile station  
returns the at least one access value to the radio network on an access channel.

25           10.       (Original) A method as claimed in claim 9, wherein the access channel is  
a random access channel.

11. (Original) A method as claimed in claim 1, wherein the radio network comprises cells, and only cells capable of meeting the radio service requirement are measured in order to select one of them for use in the transmission.

12. (Original) A method as claimed in claim 1, wherein the mobile station uses the indication of the radio service requirement when making access to the radio network.

13. (New) A method of establishing transmission to mobile station via a radio network, the method comprising:

providing a paging message to the mobile station;

providing an indication of a radio service requirement to the mobile station,

wherein said indication of the radio service requirement is provided at a time other than the time said paging message is provided to said mobile station.
